

INCRA 1/10° Vernier Cursor Addendum

Using Your New 1/10° Vernier Cursor

The new Miter1000HD and Miter1000SE feature several enhancements not included with the standard Miter1000. Among these is the new 1/10° vernier cursor.

For readings in 1° increments using the cursor, just align any of the protractor scale marks with the "0" mark on the cursor. For 1/10° adjustments, you will notice 5 marks on either side of the "0" mark on the cursor. As you gently rotate the protractor you will read the scale as follows: At 1/10° rotation, the first mark aligns 1° away from the original starting point. At 2/10° rotation, the second mark aligns 2° away. At 3/10° rotation, the third mark aligns 3° away, etc. For 6/10° through 9/10° of rotation, watch for alignments using the marks on the opposite side of the "0" cursor mark.

Sound complicated? It's not! Just study the examples on this page.
