# STAINLESS STEEL

Precision Marking Rule Put YOUR Mark on Precision

Any rule can just measure, but only INCRA guarantees YOUR mark of precision on everything you do!

## Easy and Accurate

To mark with a 0.5mm Mechanical Pencil: Just hold the pencil vertically and draw a short line in one of the slots, or twist the pencil in a hole to mark a dot.

To mark with a Wooden Pencil: First, sharpen the pencil, then twist the lead once or twice in any one of the holes to give it an ultra fine point ready for marking.

#### To mark with a Metal Scribe or Center

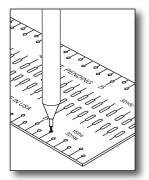

**Punch:** Any scribe or center punch sharp enough to fit through the holes can be used. Use finger pressure ONLY to mark a precisely located "dimple" in soft materials such as wood, paper, plastic, brass or aluminum. **DO NOT** damage your precision rule by pounding the point through the hole with a hammer.

### **Precision Marking Rule**

#### Marking:

Place your sharp pencil point or scribe in the desired hole or slot, then make your mark.

**Measuring:** Use the scale lines on the edges to make precision measurements.

WARNING: This product can expose you to chemicals, including chromium, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

When accuracy counts... INCRA RULES!

INCRA RULES are available in many other popular styles and lengths.
