

STAINLESS STEEL

INCRA RULES

MADE IN THE
USA

INCRA has re-invented the steel rule by putting micro-fine marking holes at every scale position to locate a sharp pencil point or scribe exactly on target! Now, instead of squinting as you try to line up your pencil on that blur of lines along the edge of your old steel rule, you can instantly put your mark precisely where you want it with zero uncertainty and no eye strain.

6" Precision T-Rule

Put YOUR Mark on Precision

Any rule can just measure, but only INCRA guarantees YOUR mark of precision on everything you do!

Easy and Accurate

To mark with a 0.5mm Mechanical Pencil: Just hold the pencil vertically and draw a short line in one of the slots, or twist the pencil in a hole to mark a dot.

To mark with a Wooden Pencil: First, sharpen the pencil, then twist the lead once or twice in any one of the holes to give it an ultra fine point ready for marking.

To mark with a Metal Scribe or Center Punch: Any scribe or center punch sharp enough to fit through the holes can be used. Use finger pressure ONLY to mark a precisely located "dimple" in soft materials such as wood, paper, plastic, brass or aluminum. **DO NOT** damage your precision rule by pounding the point through the hole with a hammer.

Precision T-Rule

Your INCRA T-Rule is a precision measuring and marking instrument for use in many applications.

Marking relative to the end or edge of your workpiece:

Put the T-Bar against the end or edge of your workpiece, then make your mark in the hole or slot at the desired measurement.

Making vertical measurements:

Position the T-Rule at one end of the T-Bar as shown. The scale at the end of the T-Rule can be used for vertical measurements.

Drawing a line parallel to the edge of your workpiece:

You can draw a line by sliding the T-Bar along the edge of your workpiece while holding the pencil vertically in one of the holes at the desired measurement.

Adjusting the T-Bar:

Your INCRA T-Rule comes fully assembled. If you ever loosen the two thumb screws, be sure to place the end of the T-Rule firmly against the indexing lip on the T-Bar before retightening to insure perfect accuracy.

Drawing a line perpendicular to the edge of your workpiece:

With the T-Bar against your workpiece at the desired location, draw a line along the T-Rule's edge.

When accuracy counts ... INCRA RULES!

INCRA RULES are available in many other popular styles and lengths.
